SPRING 1930 SPECIAL WHOLESALE PRICE LIST

WALLINGFORD NURSERIES OF
BARNES NURSERY & ORCHARD CO.
WALLINGFORD, CONN.

Mass planting of shrubbery is especially effective in hiding unsightly places as well as to improve the front yard.

Please do not confuse us.
We have no connection with any other "Barnes" Company. Members of our company are:

J. Norris Barnes Norman H. Barnes
James P. Barnes

TO OUR FRIENDS:

Another season has rolled by and we wish to express our thanks to our customers and our appreciation of business given us whether it was large or small. It is our earnest endeavor to treat each order with as personal supervision as possible. Occasionally in the rush of a short shipping season, errors will occur which are cheerfully rectified when brought to our attention.

It has always been our policy to give the most for the least possible price. We have no salesmen, and here is a big saving we have passed on to our customers. Recently, we have issued simply an abbreviated catalogue or circular. This of course greatly cuts the cost of our advertising and makes possible a still lower selling rate.

IF FURTHER DESCRIPTION OF VARIETIES IS DESIRED, WE SHALL BE VERY GLAD TO FURNISH A DESCRIPTIVE CATALOGUE.

CERTIFICATION

Our experience in the past, has been that few people are willing to pay the additional cost of having seals put on to certified trees. However, we are still continuing our practice of having the trees inspected by Dr. J. K. Shaw of Amherst, Mass., nationally known as the originator of identification of apple trees by their leaf characteristics. Dr. Shaw's statement of the 1929 inspection follows:

August 10, 1929

TO WHOM IT MAY CONCERN:

This is to state that I have examined for trueness of name the two year apple stock now growing in the nursery of Wallingford Nurseries, Wallingford, Connecticut and as the trees now stand in the nursery row they are, to the best of my knowledge and belief, true to name.

J. K. Shaw

READ WHAT DR. SHAW SAYS

August 10, 1929

Gentlemen:-

I am enclosing herewith a bill for looking over your nursery, apportioning you a share of the expense of the trip which seems to me fair to you and your neighbor. I think this is the first time I have looked over a nursery absolutely free from misnamed trees.

Very truly yours,
J. K. Shaw

NON-WARRANTY

We strive to avoid mistakes but in the event that any nursery stock sold by us should prove untrue to the label under which it is sold, provided notice and proper proof are furnished to the seller, the seller shall, at the option of the buyer, either refill that portion of the order which was mislabeled, by another delivery of stock or refund the purchase price. But in any case the seller is not to be held responsible for a sum greater than the original selling price of such stock. All sales or agreements to sell are made subject to shortage of nursery stock from fire, frosts, flood, drought or other causes beyond control of the sellers.

TO OUR NEW JERSEY CUSTOMERS:

Owing to the new New Jersey Law which went into effect January 1, 1927, we wish to especially mention the following:

We take every precaution to have our stock true to label. First, all budding wood of peach and apple has been taken from bearing orchards. Secondly, we have had our apple trees inspected by Dr. J. K. Shaw of Amherst, Mass., for trueness to name, and he has pronounced them O. K. There is as much chance of mixture through carelessness or irresponsible planters as in any other way, and we will not under any circumstances sell stock to any one under the provisions of the New Jersey Law on Trueness to Name and all orders taken by us are accepted subject to the provisions of our Non-Warranty clause.

APPLICATION OF PRICES

Customers may select 10 of any kind of fruit such as 10 peach, at the 10 rate, 50 at the 100 rate, 500 at the 1000 rate.

MINIMUM ORDER

On account of the high cost of handling orders, we cannot accept orders of less than \$1.00.

DISCOUNT

5% Discount may be deducted on all orders where the total amount is remitted with the order and this is sent before April 1st.

Caliper or Diameter governs the size of all trees except 1 year apple. Height is only approximate.

Woburn, Mass.

Dear Sirs:-

I want to thank you for the fine way you sent me the nursery stock. The digging and packing was certainly scientific and skillfully done. I have received nursery stock many times before but never sent as you have sent me. Many thanks and wish you good luck.

L. O. Trudeau

Highwood, Conn.

Gentlemen:-

Received the shrubs today and they are certainly fine.

Mrs. H. O. Berthal

Bridgeport, Conn.

Dear Sirs:-

Received my trees in wonderful condition.

Mrs. W. J. Wade

Woodbridge, Conn.

Gentlemen:-

The last order was received in good condition. The stock was fine.

Carl W. Clark

York, Penna.

Gentlemen:-

The grapes and berries were very satisfactory, in fact, very much better than I had expected them to be owing to the reduced price you offered them.

Jack Hastetter

PEACHES

Our peach trees came through the winter in perfect condition. For Spring 1930 we shall also have spring dug trees only.

Peaches in general brought satisfactory prices in 1929. Aside from a few orchards, moth damage was not as severe as in previous years. Parasites are getting in their work. Organized breeding of parasites is now being carried on by the states of New York, New Jersey and Connecticut, and we believe firmly that the worst of the moth is past in those sections where it has already been.

Peach trees are less plentiful in the United States this year than for many years. A WORD TO THE WISE. DON'T DELAY IN PLACING ORDERS.

On account of our peach trees being in the field, we will not have an accurate grade count until Spring, which possibly may make a substitution of sizes necessary in certain instances, but we hope not. Plant 18 to 20 ft. apart.

	Each	Ten	100	1000
1½ in. cal. and up, 5-7 ft. Extra large grade	\$0.75	\$6.50	\$40.00	Write for

5½-7 in. cal. 2½-4 ft.	.30	2.50	15.00	500
2-3 ft.	.20	1.50	12.50	trees
1½-2 ft.	.15	1.00	9.00	

TIME FOR RIPENING IS FOR CONNECTICUT CONDITIONS

Greensboro. August 1st. Medium size. White flesh. Very productive.

Arp Beauty. August 3rd. Medium size. Yellow flesh. Very productive.

Extra fine quality.

Carman. August 15th. Medium to large. White. Very hardy variety.

Cumberland. New. A very improved Carman, originated by the New Jersey Experiment Station. Larger, better colored and ABSOLUTELY FREE-STONE, ripening at same time as Carman, or a trifle ahead.

.05 each over other varieties.

Golden Jubilee. We offer this new introduction of the New Jersey Experiment Station this year for the first time, with a very limited number of trees available. The buds of these trees were taken from trees grown by the New Jersey Experiment Station.

We quote here the description as given by the New Jersey Station.

The Golden Jubilee peach is a second generation seedling of Elberta X Greensboro. It is a vigorous tree similar to Elberta in habit and foliage. The

variety sets fruit buds freely, blooms a few days later than Elberta and appears to be a little more hardy. The fruit is oval in form, freestone and very similar to Elberta, in shape, color and appearance. The size is a little smaller than Elberta, but the quality is fully as good. Its season is 3 to 5 days earlier than Carman or about 3 weeks earlier than Elberta. This new peach should be set upon ideal, sandy or gravelly, peach soils for best results. It was first introduced by the New Jersey Station in 1926.

.10 each over other varieties.

Rochester. August 20th. Medium size. Yellow. Very hardy variety.

Eclipse. New. A large YELLOW FREESTONE ripening just after Carman. Originated at New Jersey Experiment Station.

.05 each over other varieties.

Belle of Georgia. September 1st. Often called White Elberta. Fine variety.

Elberta. September 4th. Known to all. King of Peaches.

J. H. Hale. September 8th. Extra large. Round. Otherwise similar to Elberta.

Lizzie. September 20th. Best of its season. Similar to Elberta, being a chance seedling of that variety. Not quite as much red, but otherwise similar.

SOUR CHERRIES

	Each	Ten	100
4 yr. Extra Large Grade, 1 in. cal.	\$1.25		
			Only Montmorency
			In this size.

Please write in the quantity, full name of variety, size or age and price. Any necessary correspondence should be written on a separate sheet.

We do not substitute varieties in cases where an item is sold out unless requested to do so. If you wish a substitution, should we be unable to fill a portion of your order, write yes here in which case we will give you the nearest we can under its proper label.

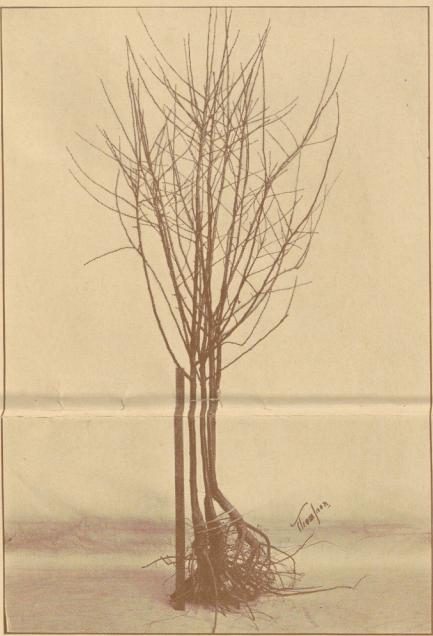

NON-WARRANTY

If any nursery stock proves untrue to the label under which it is sold, provided notice of the purchaser, either refill that portion of the order which was mislabeled by another delivery of stock or refund the purchase price, but in any case the seller is not to be held responsible for a sum less than the original selling price of the stock. All sales or agreements to sell are made subject to shortage of nursery stock from fire, frost, floods, drought or other causes beyond control of the seller. Except for the aforesaid agreed liability, it is agreed that the seller, Barnes Nursery & Orchard Co., gives no warranty, either express or implied, as to description, productiveness, or any other matter of nursery stock it sells.

SHRUBS

Shrubs naturally vary in their habits of growth. Some dwarf, others of medium growth, and still others larger. We shall in each instance furnish number one plants of the varieties listed.

\$0.50 each except where otherwise stated.

Althea. (Rose of Sharon) Red, pink, or white. Very erect. Late Summer.

Almond. Pink flowering. Beautiful old fashioned plant. Each 75c.

Andalus Molls. A Japanese variety ranging from yellow to orange. 12-18 in. @ \$2.50.

Azalea Kaempferi. (Torch Azalea) Beautiful orange red flowers. 12-15 in. @ \$2.50 each.

Barberry. Red leaved. 12-18 in. @ \$1.00.

Butterfly Bush. Although of a woody nature, the growth kills back each winter to within a few inches of the ground then making from three to five feet the following summer, it being covered with purple or lavender sweet scented flowers which attract myriads of butterflies. Hence its name.

Deutzia Gracilis. Dwarf white. June.

Deutzia. Pride of Rochester. Double white. Early June.

Forsythia. (Golden Bell) Brilliant yellow in late April or early May.

Honeysuckle, Pink Tartarian. Pink flowers. June. Followed by red berries in late summer. Very attractive.

Honeysuckle, White Tartarian. Similar to the pink variety, but flowers white.

Hydrangea P. G. Large cone shaped flowers. Late Summer.

Hydrangea Hills of Snow. White ball shaped flowers. July till frost. Each 75c.

Indian Currant. Pink flowers, followed by red berries.

Japan Currant. Brilliant scarlet flowers in May. Each 75c.

Kerria Japonica. A most striking bush with greenish bark and double yellow blossoms in June. 75c each.

Lilac. Purple or white.

Lilac. Named varieties, 2-3 ft. @ \$1.00.

Amelia Dupry. Single, light blue. Madam Lemoine. Large, double white.

Doyen Ketteler. Double, light pink.
